

# HEALTH CHECK

 **CHILLISOFT**  
eset@chillisoft.net

Security systems change over time and it is imperative that you ensure your implementation still provides the best protection possible. Get one of our certified ESET professional services engineers to review your current ESET deployment to ensure the setup is done according to best practice and there is no underlying security misconfiguration or system vulnerability that can compromise your security.

Our engineers will look at the following and make appropriate recommendations on what they find:

- ✓ Review alerts, alarms, and detections
- ✓ Review management server health and performance
- ✓ Review product licensing and versions
- ✓ Review endpoint health
- ✓ Review policies
- ✓ Review notifications
- ✓ Review invalid objects

**01**  **CHILLISOFT Labs** has fully trained and certified ESET engineers

**02** We offer a comprehensive cybersecurity check-up

**03** We will provide a full report, including an Executive Summary and Recommendations
